

4-POINT HAMMOCK STAND

ASSEMBLY INSTRUCTIONS – NO TOOLS REQUIRED

This carton contains:

- 2 – Header Bars
- 4 – Uprights
- 2 – Straight Base Rails
- 2 – Tapered Base Rails
- 1 – Bag of Hardware

ASSEMBLE STAND (See Illustration)

Assemble as shown starting with joining the base rails. A tapered base rail fits into a base rail without a taper. The uprights fit inside the curved end of the base rail. A header bar fits inside the tops of two uprights on each end. Please make sure the safety pins are snapped in place.

WARNING: Make sure your stand is properly assembled/secured using instructions given and illustration provided BEFORE attaching hammock bed to stand.

ASSEMBLE HARDWARE (See Illustration)

The carton contains a bag of hardware consisting of:

- 4 – Spiral/V-Hooks
- 2 – Loop Rings
- 4 – Lockwashers
- 2 – Loop Rings with Chain

Take each header bar and place the straight side of a Spiral/V-hook into the two outer holes going completely thru the tubing and out the bottom of the tube. The curved portion of the Spiral/V-hook should point toward the inside of the stand.

ASSEMBLE BED (See Illustration)

Slide a dowel through the sewn hem at each end of the hammock lounge bed, at the same time inserting a loop ring on the dowel as it passes by the cut-out portions of the bed. MAKE SURE THAT THE TWO LOOP RINGS WITH CHAIN ARE BOTH AT ONE END OF THE LOUNGE BED.

ATTACH HAMMOCK (See Illustration)

Attach the completed bed to the stand by placing the two loop rings at the head end over the curved portion of the Spiral/V-hooks. At the foot end attach the ends of the chain to the Spiral/V-hooks on the header bar. Lock the Spiral/V-hooks to the tubing by screwing a lockwasher onto the end of the Spiral/V-hook sticking out of the bottom of the tubings.

PLEASE NOTE:

The Spiral/V-Hooks are shaped and curved to provide the maximum amount of safety once the hammock is assembled.

YOUR ALGOMA HAMMOCK is ready for use. Relax and enjoy it. Through usage, the bed may stretch. You can take up this slack by tightening up the chain.

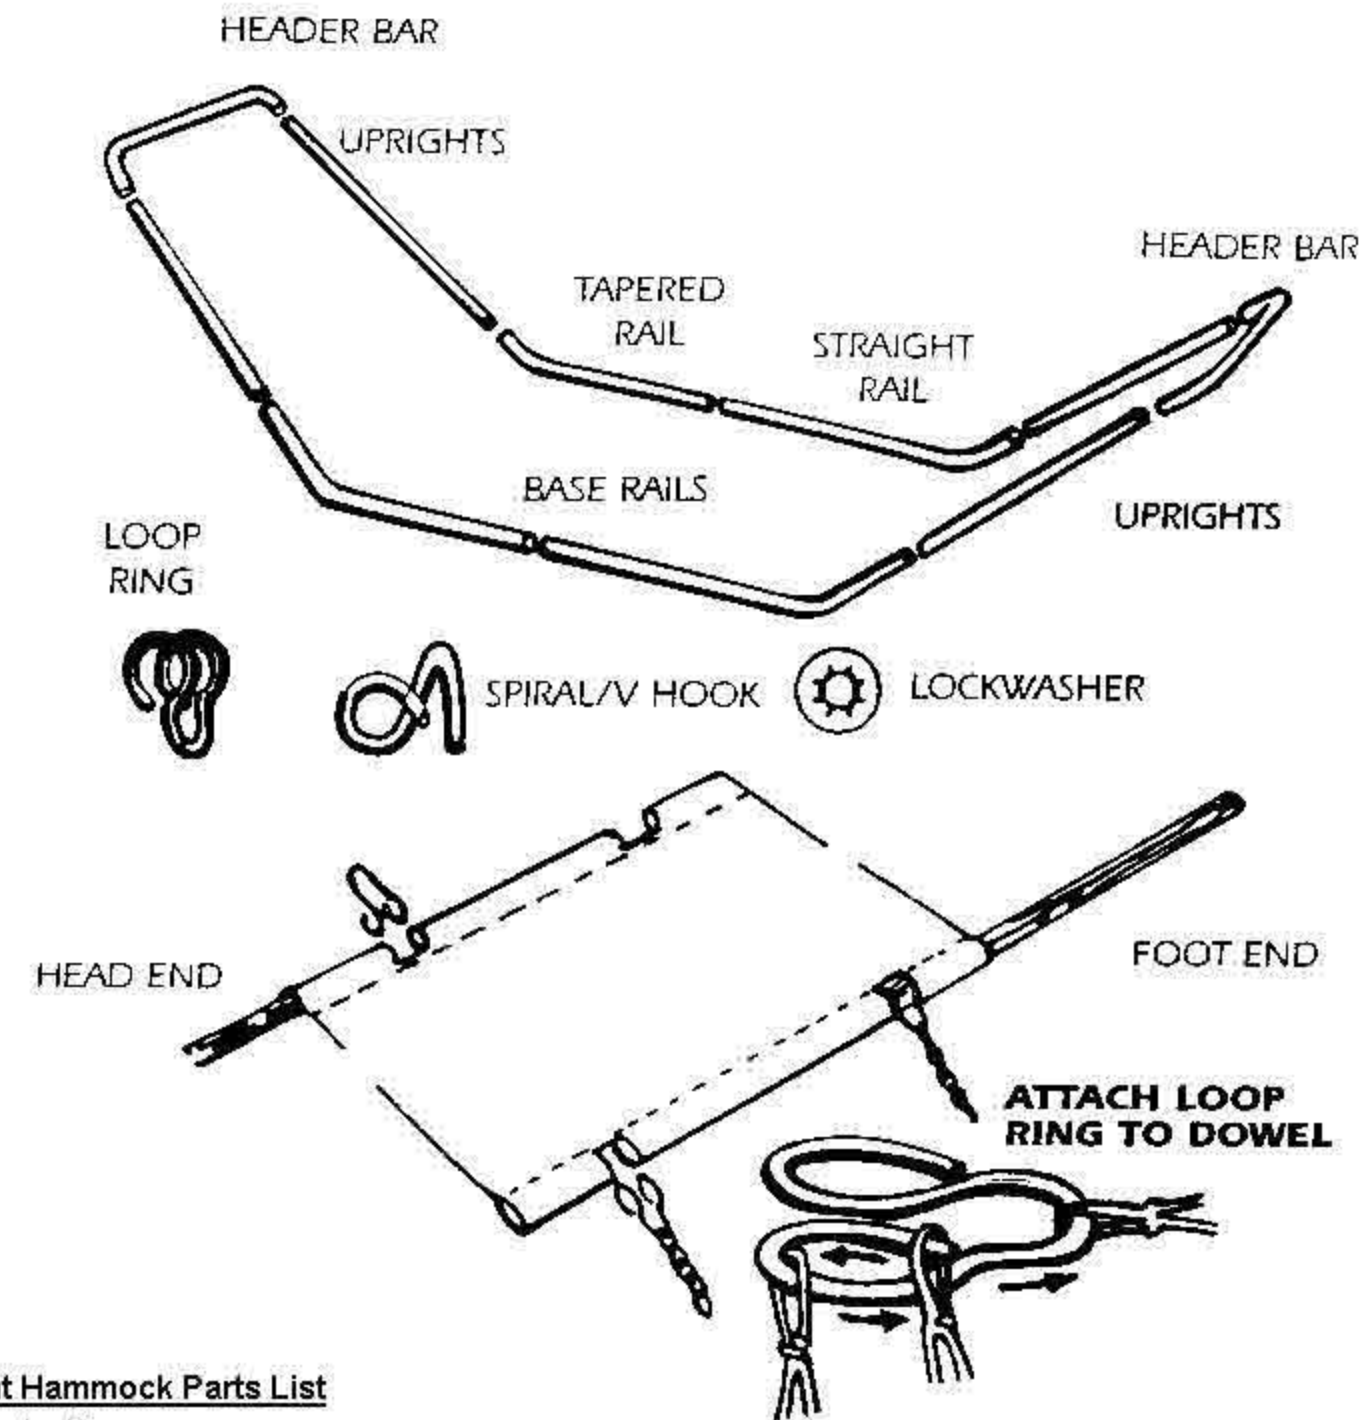

If any part is missing you can obtain it by writing to the factory stating the part name, instruction sheet number, and the model number shown on the carton.

MODEL NUMBER: 6401-33GC
